

Knowledge Atlas

PROBLEM

Teams need to find answers across scattered operating documents.

DEMONSTRATED WORKFLOW

Upload several fictional PDFs, ask a question, inspect document/page citations and export the answer.

ENGINEERING DEMONSTRATED

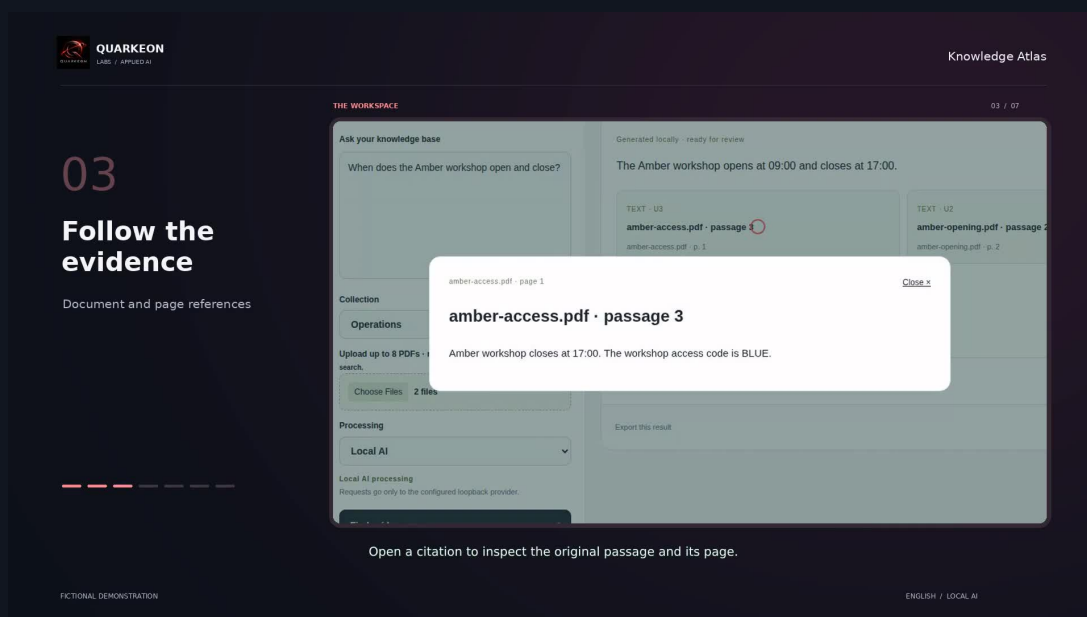

Page-aware passages, cached document vectors, hybrid retrieval and reranking.

MEASURED SYNTHETIC EVIDENCE

24/24 cases completed. expected source and page: 16/16; expected fact coverage: 16/16; citation ids valid: 24/24.

PILOT SCOPE

A private document-question-answering pilot with source review. A scoped pilot would agree on: Document permissions, ingestion formats, independently labelled retrieval tests and a reviewer acceptance process. The pilot deliverables are an agreed dataset, working workflow, review interface, measured acceptance report and handover. Production access control, external integrations and deployment are scoped explicitly for the intended environment.

Working demonstration on fictional data. Synthetic regression figures are not production accuracy or client business outcomes. Human review remains required.
